

You need the right tool for the job, especially if you're developing speech applications. *Speech Technology* magazine's 2009 Developers' Technical Directory will help you find the right developers tools for a variety of tasks that will help you make your life easier — and your implementations more successful. We strive to serve the developers' community in print, online, and at our conference, SpeechTEK, where you can dive into relevant conference sessions and network with peers.

To research these solutions further, please visit our website, www.speechtechmag.com/DevelopersDirectory, and get further comprehensive information about these providers, or visit their Web sites directly.

APRIL 27

2009 Developers'

Technical

Directory

Reach out to the developer community!

TARGET

Developer communities are notoriously underserved. *Speech Technology* solves that problem with our Annual Developers' Directory. This is a great way for your company to highlight products targeted toward both seasoned and novice developers who are looking into implementation for the first time.

SAVINGS

Companies will be investing more money in their own people to educate them rather than hiring an outside company. Give them the tools they will need to make their deployments as easy as possible and a success.

PRESENCE

This directory will also be available in both the print and digital editions with live links as well as online at www.speechtechmag.com, www.speechtek.com and on *Speech Technology's* newest site, www.speechblog.com and in the *eWeekly* newsletter.

2009 Listing Rate Card:

Basic – \$300

Avaya DevConnect Developer & Partner Program

Whether you are migrating your customer service applications from touch tone to speech, or creating new self-service solutions for vertical markets, membership in the Avaya DevConnect program can accelerate your success.

DevConnect is a comprehensive developer and partner program, offering a range of developer-oriented resources, technical support options and go-to-market programs to serve both in-house IT organizations and commercial application developers.

As a Registered DevConnect member, you'll gain access to a wealth of resources and programs including:

- Free downloads of Avaya Dialog Designer, an Eclipse-based IDE for self-service application development used by over 1000 organizations worldwide to create intelligent communications solutions for Avaya Voice Portal and Avaya Interactive Response
- Technical documentation and educational materials, conferences, and Community forum boards
- Sample applications, including Dialog Designer Elements—a free suite of reusable & customizable speech application modules that can save hundreds of hours of development time
- Free access to our Self-Service Remote Lab environment for prototyping and testing with the most current releases of Avaya Voice Portal

By upgrading your DevConnect membership, Avaya customers can take advantage of enhanced technical support, while ISV and SI partners can also receive procurement discounts for lab systems, compliance testing and co-marketing benefits.

DevConnect membership is FREE, so why not join today? Learn more at www.avaya.com/devconnect.
